

## Ø 10 mm Film Dielectric Trimmers

### FEATURES

- Housing diameter 10 mm
- For a basic grid of 2.54 mm (0.1") or 2.50 mm
- Top and bottom or top adjustment
- Round head
- Mounting: radial
- Material categorization: for definitions of compliance please see [www.vishay.com/doc?99912](http://www.vishay.com/doc?99912)

**RoHS**  
COMPLIANT

### APPLICATIONS

- Antennas
- Impedance matching circuits
- Medical
- RF
- For consumer and industrial equipment

| QUICK REFERENCE DATA                                       |   |                  |
|--|---|------------------|
| Rated DC voltage   | 150 V <sub>DC</sub>   |                  |
| Test DC voltage for 1 min                                  | 300 V <sub>DC</sub>   |                  |
| Maximum contact resistance                                 | 10 mΩ   |                  |
| Minimum insulation resistance                              | 10 000 MΩ   |                  |
| Category temperature range                                 | PP  | -40 °C to +70 °C |
|  | PTFE  | -40 °C to +85 °C |
| Climatic category (IEC 60068)                              | PP  | 40/070/21        |
|  | PTFE  | 40/085/21        |
| Minimum storage temperature                                | -55 °C  |                  |
| Related specification                                      | IEC 60418-1 and 4   |                  |
| Effective angle of rotation                                | 180° (rotation in 180° only, see "Life of trimmer")   |                  |
| Operating torque   | 2 mNm to 25 mNm   |                  |
| Maximum axial thrust                                       | 2 N   |                  |
| Capacitance range (C <sub>min.</sub> / C <sub>max.</sub> ) | 2.5 pF / 15 pF to 5.5 pF / 65 pF  |                  |
| Life of trimmer  | Maximum 10 cycles: rotation in 180° only (the electrical and mechanical performance is not guaranteed if rotated beyond 10 cycles)  |                  |
| Quality level  | Sampling and data evaluation for quality level in accordance with "MIL-STD-105D" and "IEC 60410":<br>< 0.15 % major defects<br>< 0.65 % minor defects<br><br>Each capacitor is tested for minimum C <sub>max.</sub> and is also subjected to the full test voltage. |                  |

**DIMENSIONS** in millimeters

Trimmers BFC2 808 ..... series

R = Rotor, S = Stator

The large hole is for bottom adjustment and the diameter is determined by user's requirements.

R = Rotor, S = Stator

Hole pattern

**ADJUSTMENT**

For top adjustment a screwdriver or trimming key can be used; for bottom adjustment a key is required as shown below.

Bottom adjustment key

**MOUNTING**

The trimmer can be mounted on printed-circuit boards with a grid of 2.50 mm or 2.54 mm and a minimum hole diameter of 1.25 mm.

**PACKAGING**

Bulk packaged in cardboard boxes lined with expanded plastic. For smallest packaging quantities (SPQ) see "Electrical Data" table.

## **Disclaimer**

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Vishay"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and / or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.

Except as expressly indicated in writing, Vishay products are not designed for use in medical, life-saving, or life-sustaining applications or for any other application in which the failure of the Vishay product could result in personal injury or death. Customers using or selling Vishay products not expressly indicated for use in such applications do so at their own risk. Please contact authorized Vishay personnel to obtain written terms and conditions regarding products designed for such applications.

No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted by this document or by any conduct of Vishay. Product names and markings noted herein may be trademarks of their respective owners.
